Bioterrorism Preparedness: Infectious Disease Prevention and Control

Instructors: Sten Vermund, MD, PhD; Hala Fawal, MPH, MBA, CIC; and JoAna M. Stallworth, PhD, MPH

Course Description

This course will introduce participants to basic concepts of infectious disease prevention and control. Course topics include concepts of disease control, elimination, and eradication and key strategies for infectious disease control and prevention in the context of past successes and failures.

Learning Objectives

- Understand the principles of prevention and control of infectious diseases
- Describe the concepts of disease control, elimination, and eradication
- Identify the key strategies for infectious disease control and prevention in the context of past successes and failures
- Understand the lessons learned from prior successes and failures in major disease control efforts

Preparedness & Response Core Competencies **Public Health Preparedness & Response Core Competency Model*

- 3.1: Contribute expertise to a community hazard vulnerability analysis (HVA).
